Department of Preventive Health Checkups

The department of preventive health checkups at Sarvesh Healthy is envisioned on the famous saying: Prevention is better than cure. This department offers a wide range of health checkups and medical tests that can determine the root cause of an upcoming disease. The significant benefits of having regular preventive health checkups are:

You can monitor your behaviour and lifestyle, which can affect your health adversely and ensure better health.

Preventive health checkups for the whole family at Sarvesh Health City can help you keep your family's health in check and ensure that you can take care of yourself and your family.

Prevention is better than cure, not just for your health but also for your pocket, as a disease treatment can cost you much more. It will cost you mentally and physically as well.

- Please wear comfortable clothes & footwear as you may be required to change clothes.
